I am a Chiropractor turned Full Stack Web Developer with a passion for crafting seamless digital experiences. As a Chiropractor turned Full Stack Web Developer, my background brings a holistic problem-solving approach and a keen understanding of user needs to my role. These traits seamlessly transition into creating user-centric digital solutions. Fueled by a passion for technology, I excel in both front-end and back-end development, always seeking elegant solutions for complex challenges.

Projects

Sociopedia, *Dynamic Social Networking Web Application* 🔗
- Tech Stack: MongoDB, Express, React, Node.js.
- Engineered core functionalities for a social networking platform, allowing users to post stories, interact with posts, and manage friends.
- Implemented light/dark modes for personalised user interfaces and ensured a seamless experience across devices through responsive design principles.
- Implemented robust user authentication and authorisation protocols to ensure data security and protect user information.

Fashion-Ecomm, *Fashion Ecommerce Website* 🔗
- Tech Stack: HTML, JavaScript, TailwindCSS, React
- Implement the frontend development of a fashion ecommerce site with free backend APIs, optimizing user experience with intuitive product features and integrating cart functionality.

Pet Hub, *Ecommerce Web Application*
- Tech Stack: Svelte, Tailwind CSS, NodeJS, Express, PostgreSQL.
- Designed and implemented intuitive user interfaces for seamless navigation and enhanced user experience.
- Implemented user authentication, authorisation, account management, and integrated secure payment gateways to facilitate transactions and ensure a secure shopping environment.
- Ensured project completion within tight deadlines, demonstrating effective time management.
